Reisto Bergas Abiyogo

Full-Stack Developer | Healthcare IT Systems | React, Next.js, Python, VB.NET & SQL Server
Indonesia

Summary

I'm a Full-Stack Developer with experience building responsive, reliable, and user-friendly web applications using React, Next.js, JavaScript, Python, PHP, and SQL. Alongside web development, I work at RSUD Srengat developing and maintaining healthcare information systems using VB.NET, .NET Framework, and SQL Server. I enjoy turning real operational needs into practical and maintainable digital solutions. Explore my projects at reisto01.vercel.app. Open to freelance projects, professional opportunities, and collaborations in full-stack web development.

Experience

RSUD Srengat

Information Technology Staff & Software Developer
May 2023 - Present (3 years 3 months)
Blitar Regency

- Develop and maintain SIMRS modules and supporting hospital applications using VB.NET, .NET Framework, and SQL Server.
- Analyze operational requirements from hospital units and translate them into application improvements and practical digital solutions.
- Troubleshoot application errors, database issues, reporting problems, and system workflows to maintain reliable daily operations.
- Manage SQL Server databases, application access, data integrity, backups, and supporting technical configurations.
- Support the maintenance and development of internal web-based information systems used for hospital operations.
- Collaborate with users and internal units during requirement analysis, testing, implementation, and application maintenance.
- Provide technical assistance for software, hardware, network, printer, server, and other IT operational issues.
- Prepare technical documentation, maintenance records, system procedures, and IT infrastructure recommendations.

SMKN 2 Blitar

Procurement Administrator

August 2021 - July 2023 (2 years)

Kota Blitar
